**PROFILE**

Louise is a Registered General Nurse and Advanced Nurse Practitioner with twenty-five years of experience spanning general practice and community, social and palliative care. This includes significant clinical leadership, staff recruitment and training, managing domiciliary care packages and rehabilitation, assessing, diagnosing and treating patients with a broad variety of conditions. She is also a qualified Nurse Prescriber.

She has developed and held comprehensive operational management responsibility for a successful community domiciliary care agency, including accountability for clinical governance, team leadership, training, policy development and implementation, CQC compliance and performance management. She applies this knowledge to providing detailed and reasoned care recommendations. Within this role, Louise designed, established and managed an innovative and high-performing bridging service to discharge clients into the community.

Louise has extensive expertise in production of Quantum reports for both Claimants and Defendants. She was also part of the training/ mentorship team providing training and support to new Associates. Louise has ten years of experience as an Expert Witness and often instructed to provide Part 35 Court compliant reports in relation to assessment of and provision of recommendations for care, aids and equipment for claimants who have sustained multiple and complex injuries. These injuries include, CVA mild TBI as part of trauma, amputation, spinal and Complex Regional Pain Syndrome arising from trauma or clinical negligence, as well as physical disabilities from birth. Louise also accepts instructions in loss of services claims, assessing services lost and providing recommendations for provisions that reasonably replace this loss. Louise also has experience of giving evidence in Court both remotely and in person, including at the High Court of Justice.
